

CS-5630 / CS-6630 Visualization for Data Science

How to Critique a Vis and Exam Review

Alexander Lex
alex@sci.utah.edu

Exam Format:

Google Doc Link with Instructions

Download doc or copy to edit

Write concise and relevant answers (word limit)

Redesigns by sketching by hand/tablet or in graphic design editor (no programming)

Exam

Design Critique & Redesign (everyone, 80% of grade for grads)

Given a vis, analyze what's good/bad and redesign.

Analyze in the context of theory taught

Grads: Question about readings (Crowdsourcing, Interaction)

How to Critique

1. Identify Data, Tasks / Intentions

E.g., Tabular data, network data, geospatial data

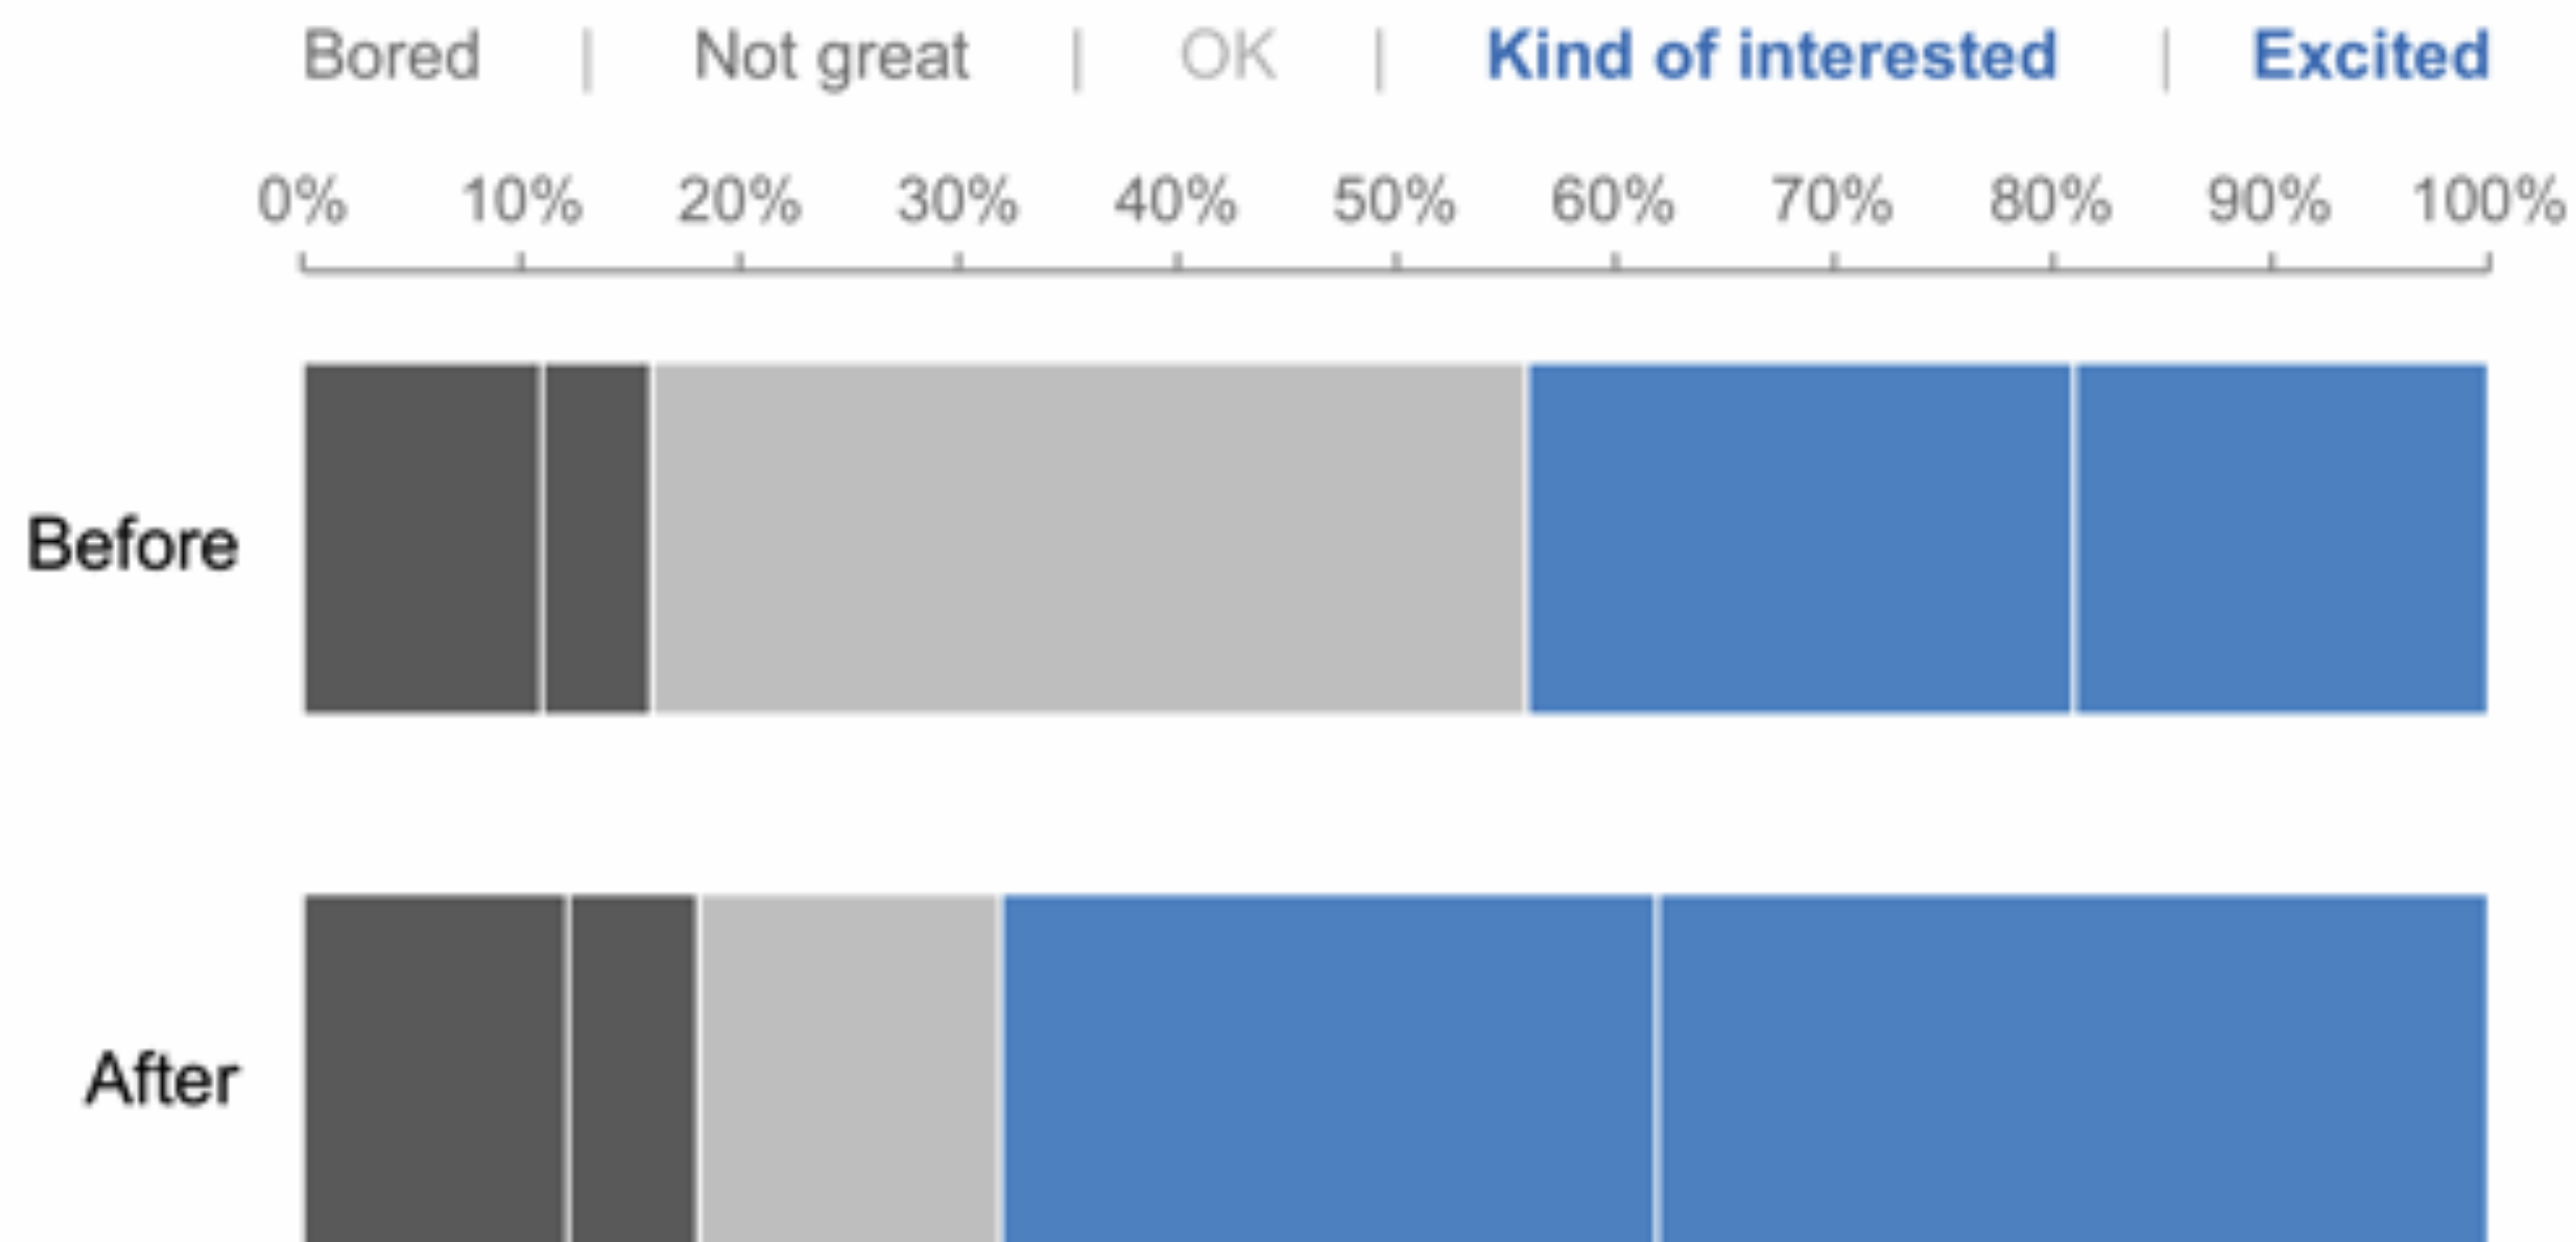

quantitative, time-series -> Task: change over time

qualitative labels (often supplementary)

quantitative, two conditions -> compare

....

How do you feel about science?

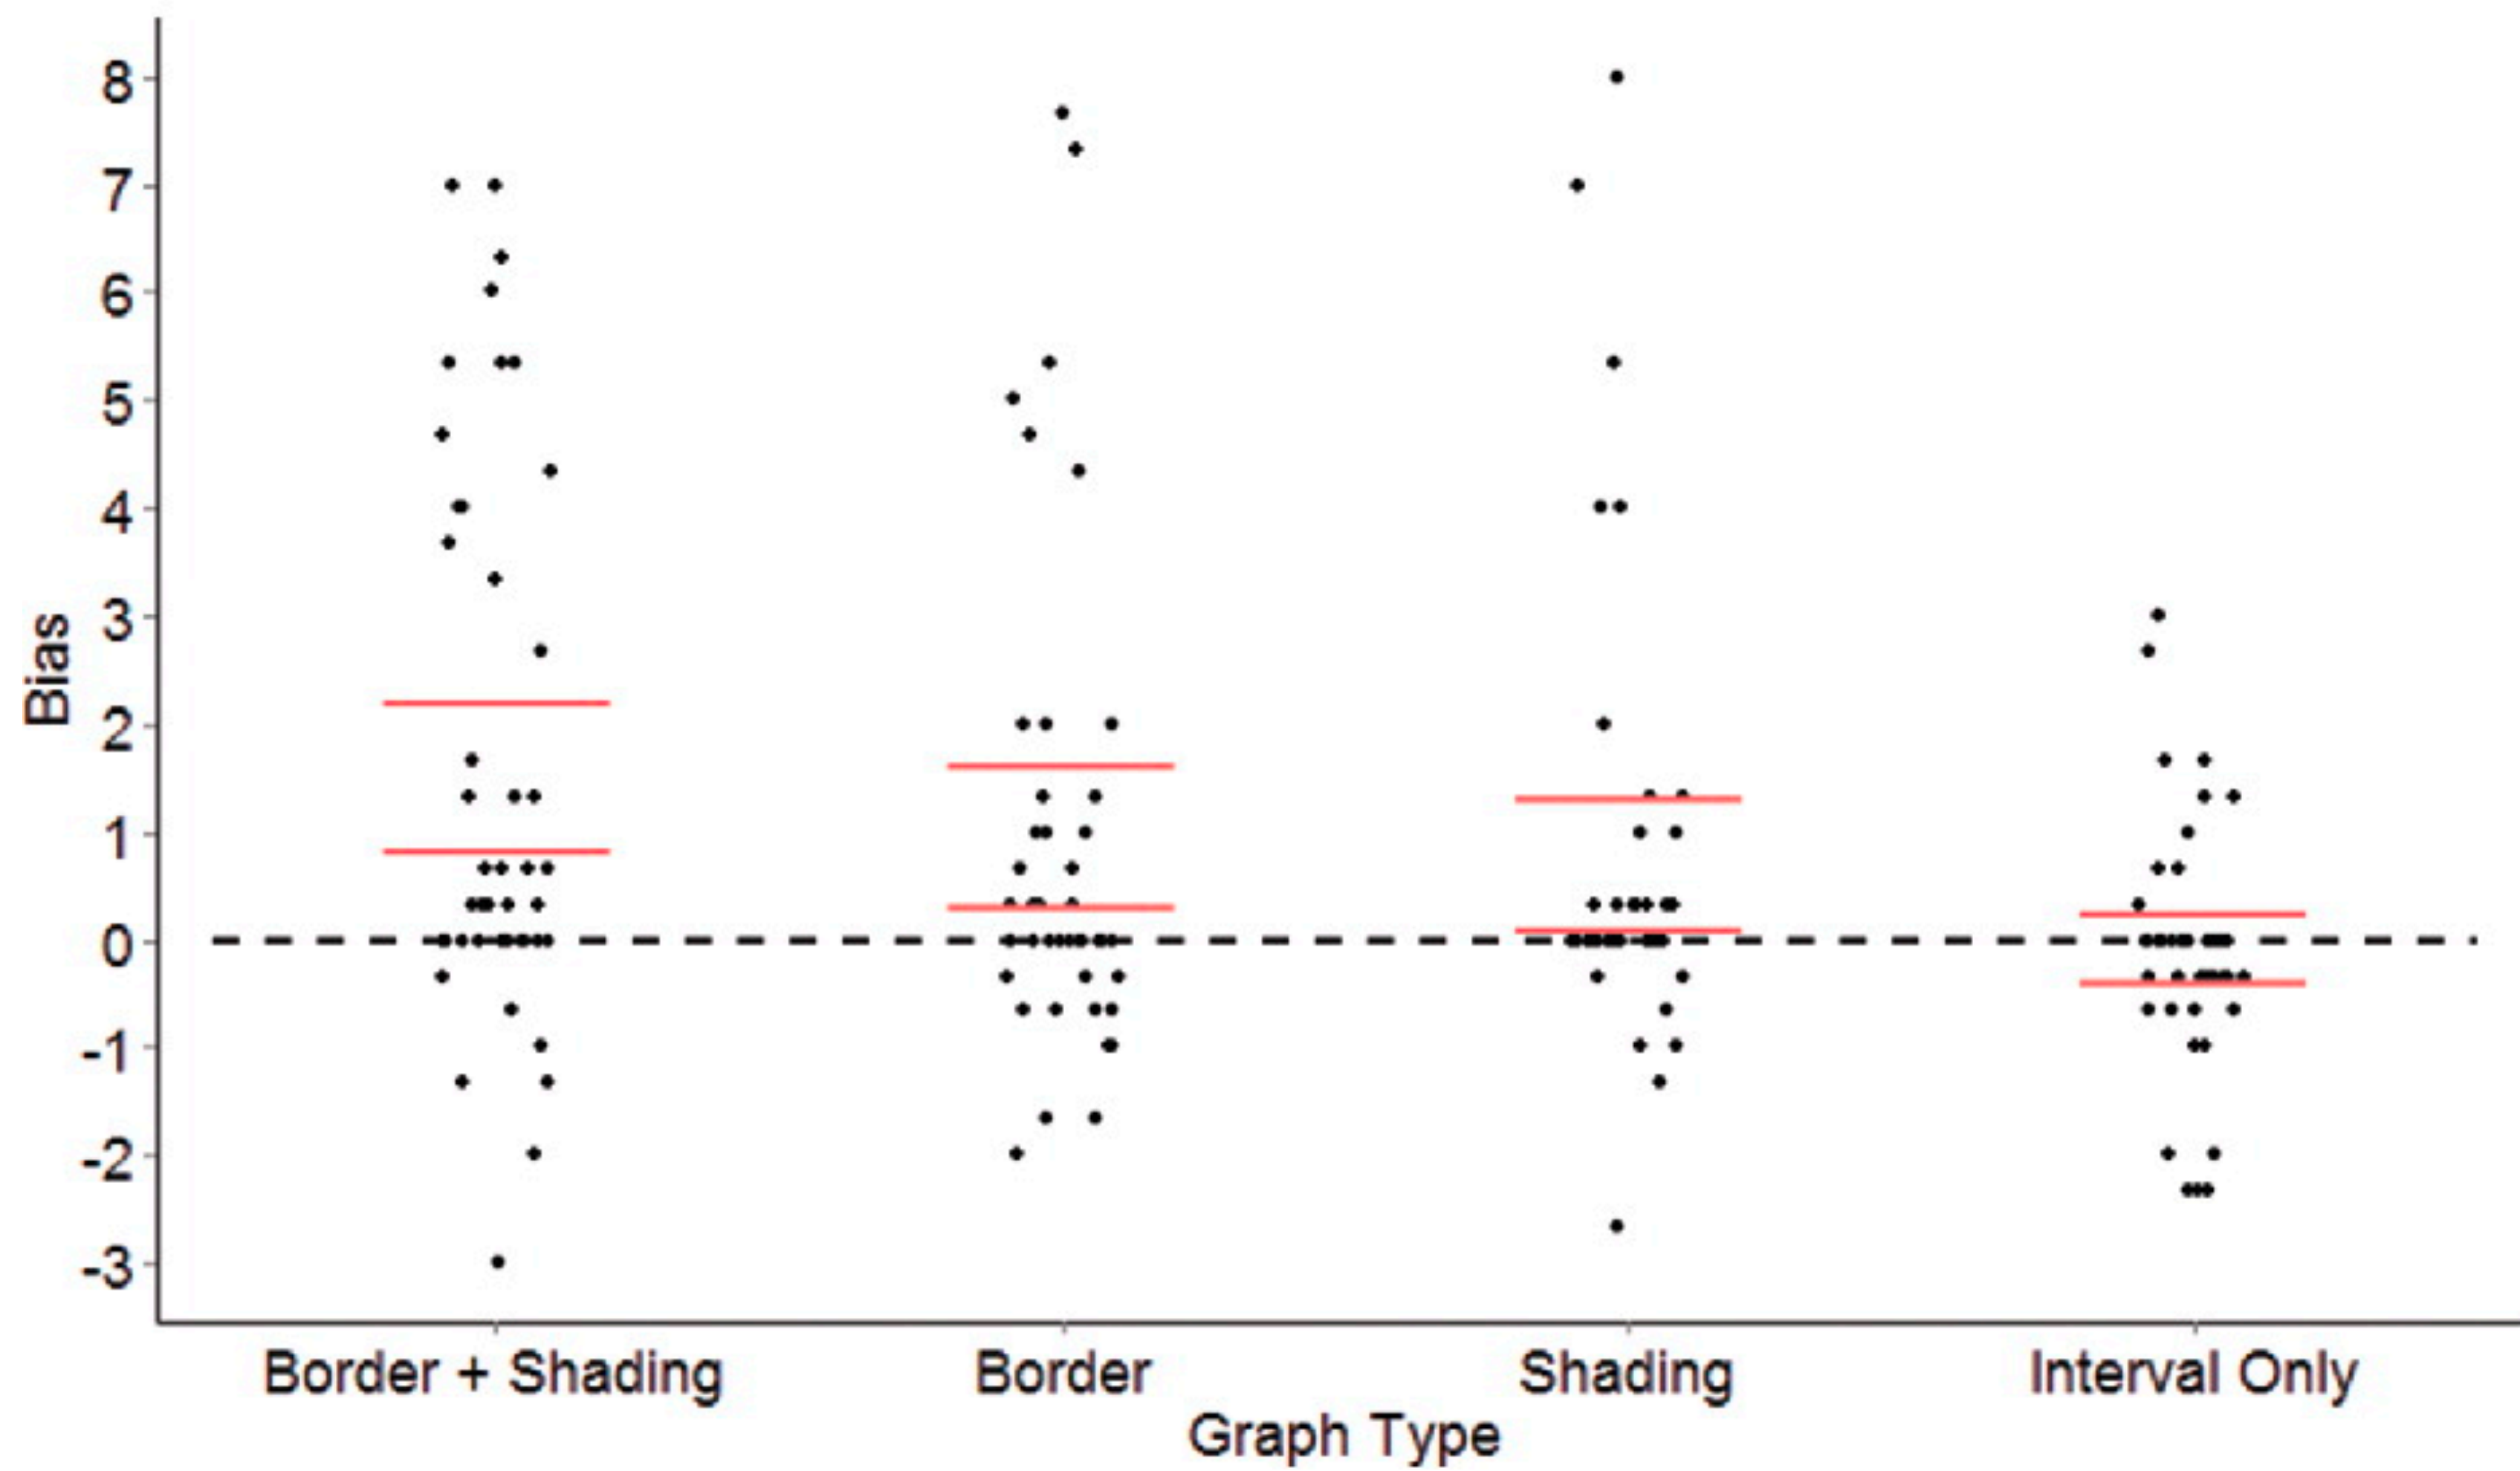

2. Identify Marks, Channels

Mark: encodes “existence” of item

point, line, shape, ...

Channels: encodes “magnitude of dimension associated with an item

position, size, saturation, color, ...

CAUSES OF UNTIMELY DEATH

Malaria—a preventable and treatable disease—is one of the biggest killers of children.

War casualties account for just 0.05 percent of total life-years lost annually.

Natural disasters are by far the fastest-growing contributor to the death toll.

Heart disease and stroke cause more than a quarter of all deaths. But since they hit mainly older people, the cost in years of life lost is relatively small.

3. Is Effectiveness Principle Followed?

Use the Best Visual Channel Available for the Most Important Aspect of your Data

Are all visual channels appropriate?

Steven's Psychophysical Power Law: $S = I^N$

4. Is the Expressiveness Principle Followed?

The visualization should show all of the data,
and only the data

If there are violations, are they justified (useful chart junk)?

Export von Bananen in Tonnen von 1994-2005

Dr. Hochhaus
Banexport 2005
Daten ZMP

5. Perceptual Issues

Color blindness, color proximity effects, shadows, etc.

Use of gestalt principles

Use of popout

6. Scales

Are the scales appropriate

IF BUSH TAX CUTS EXPIRE

TOP TAX RATE

8:01 p ET

FOX
BUSINESS

TOP STORIES

TECHNOLOGY

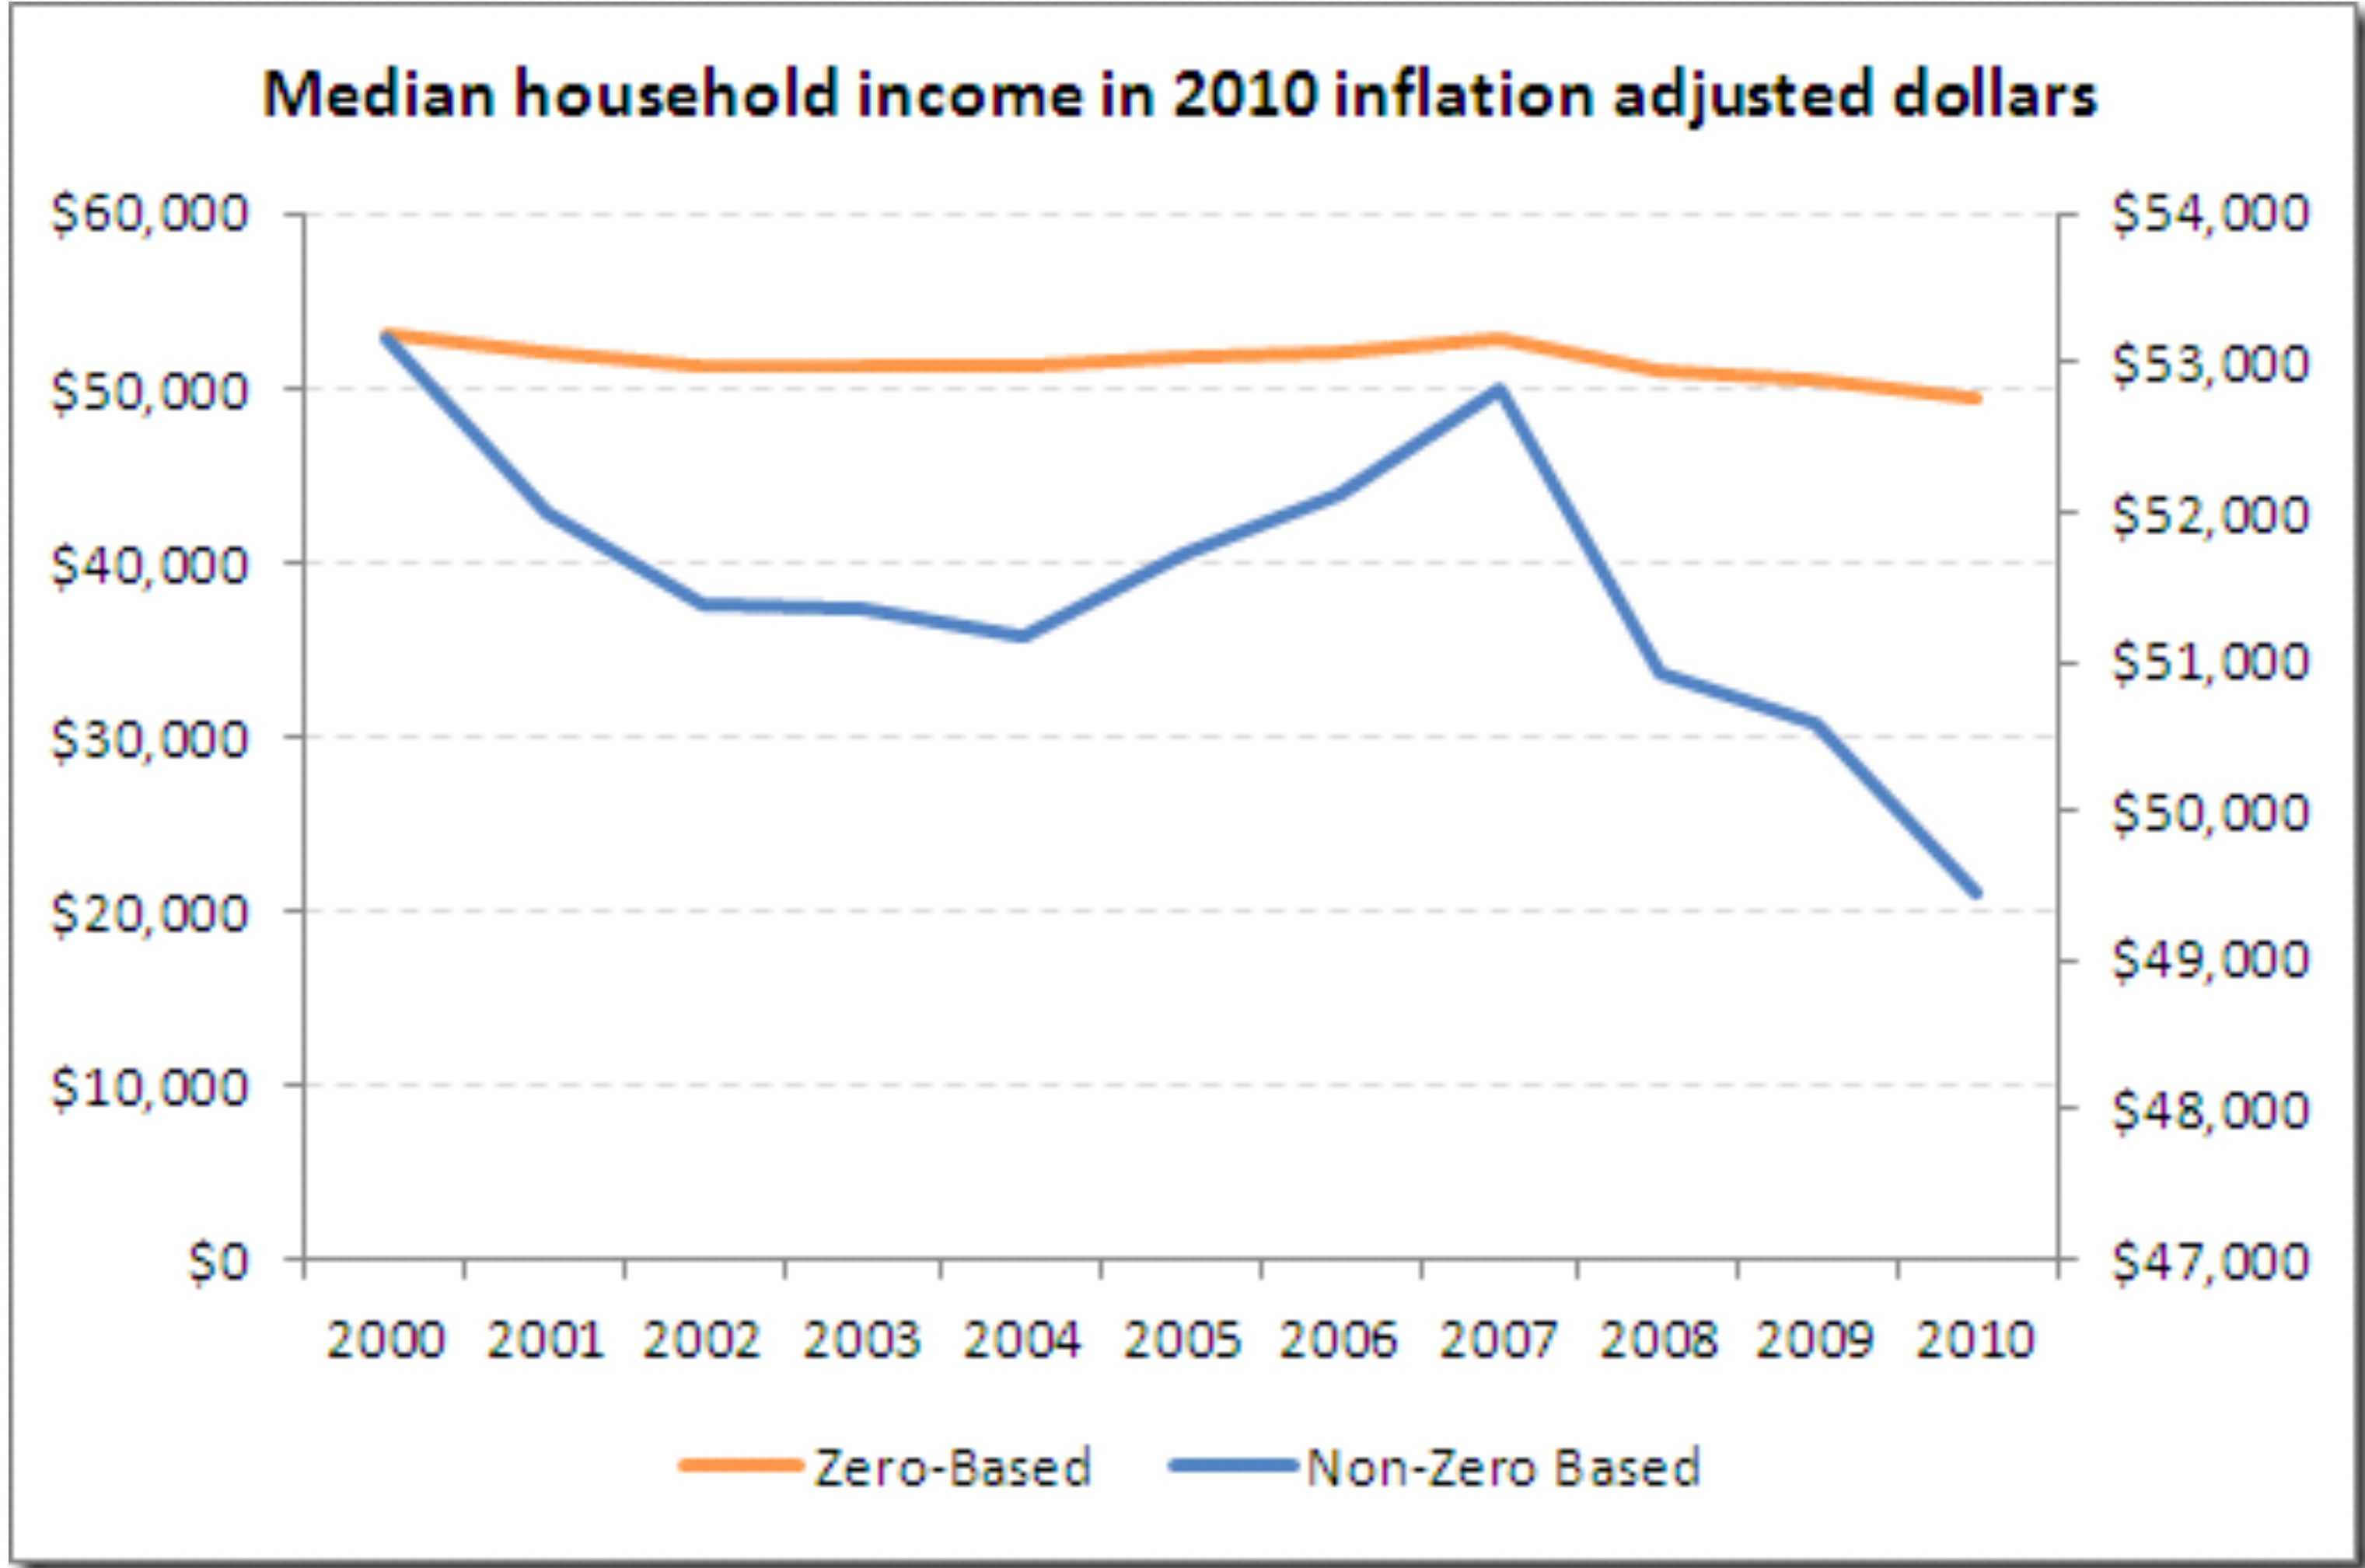

CONSUMER

WITH THE JUSTICE DEPARTMENT AND ACQUIRES FULL T

DOW 13008.68 ▼ 64.33

S&P 1379.32 ▼ 5.98

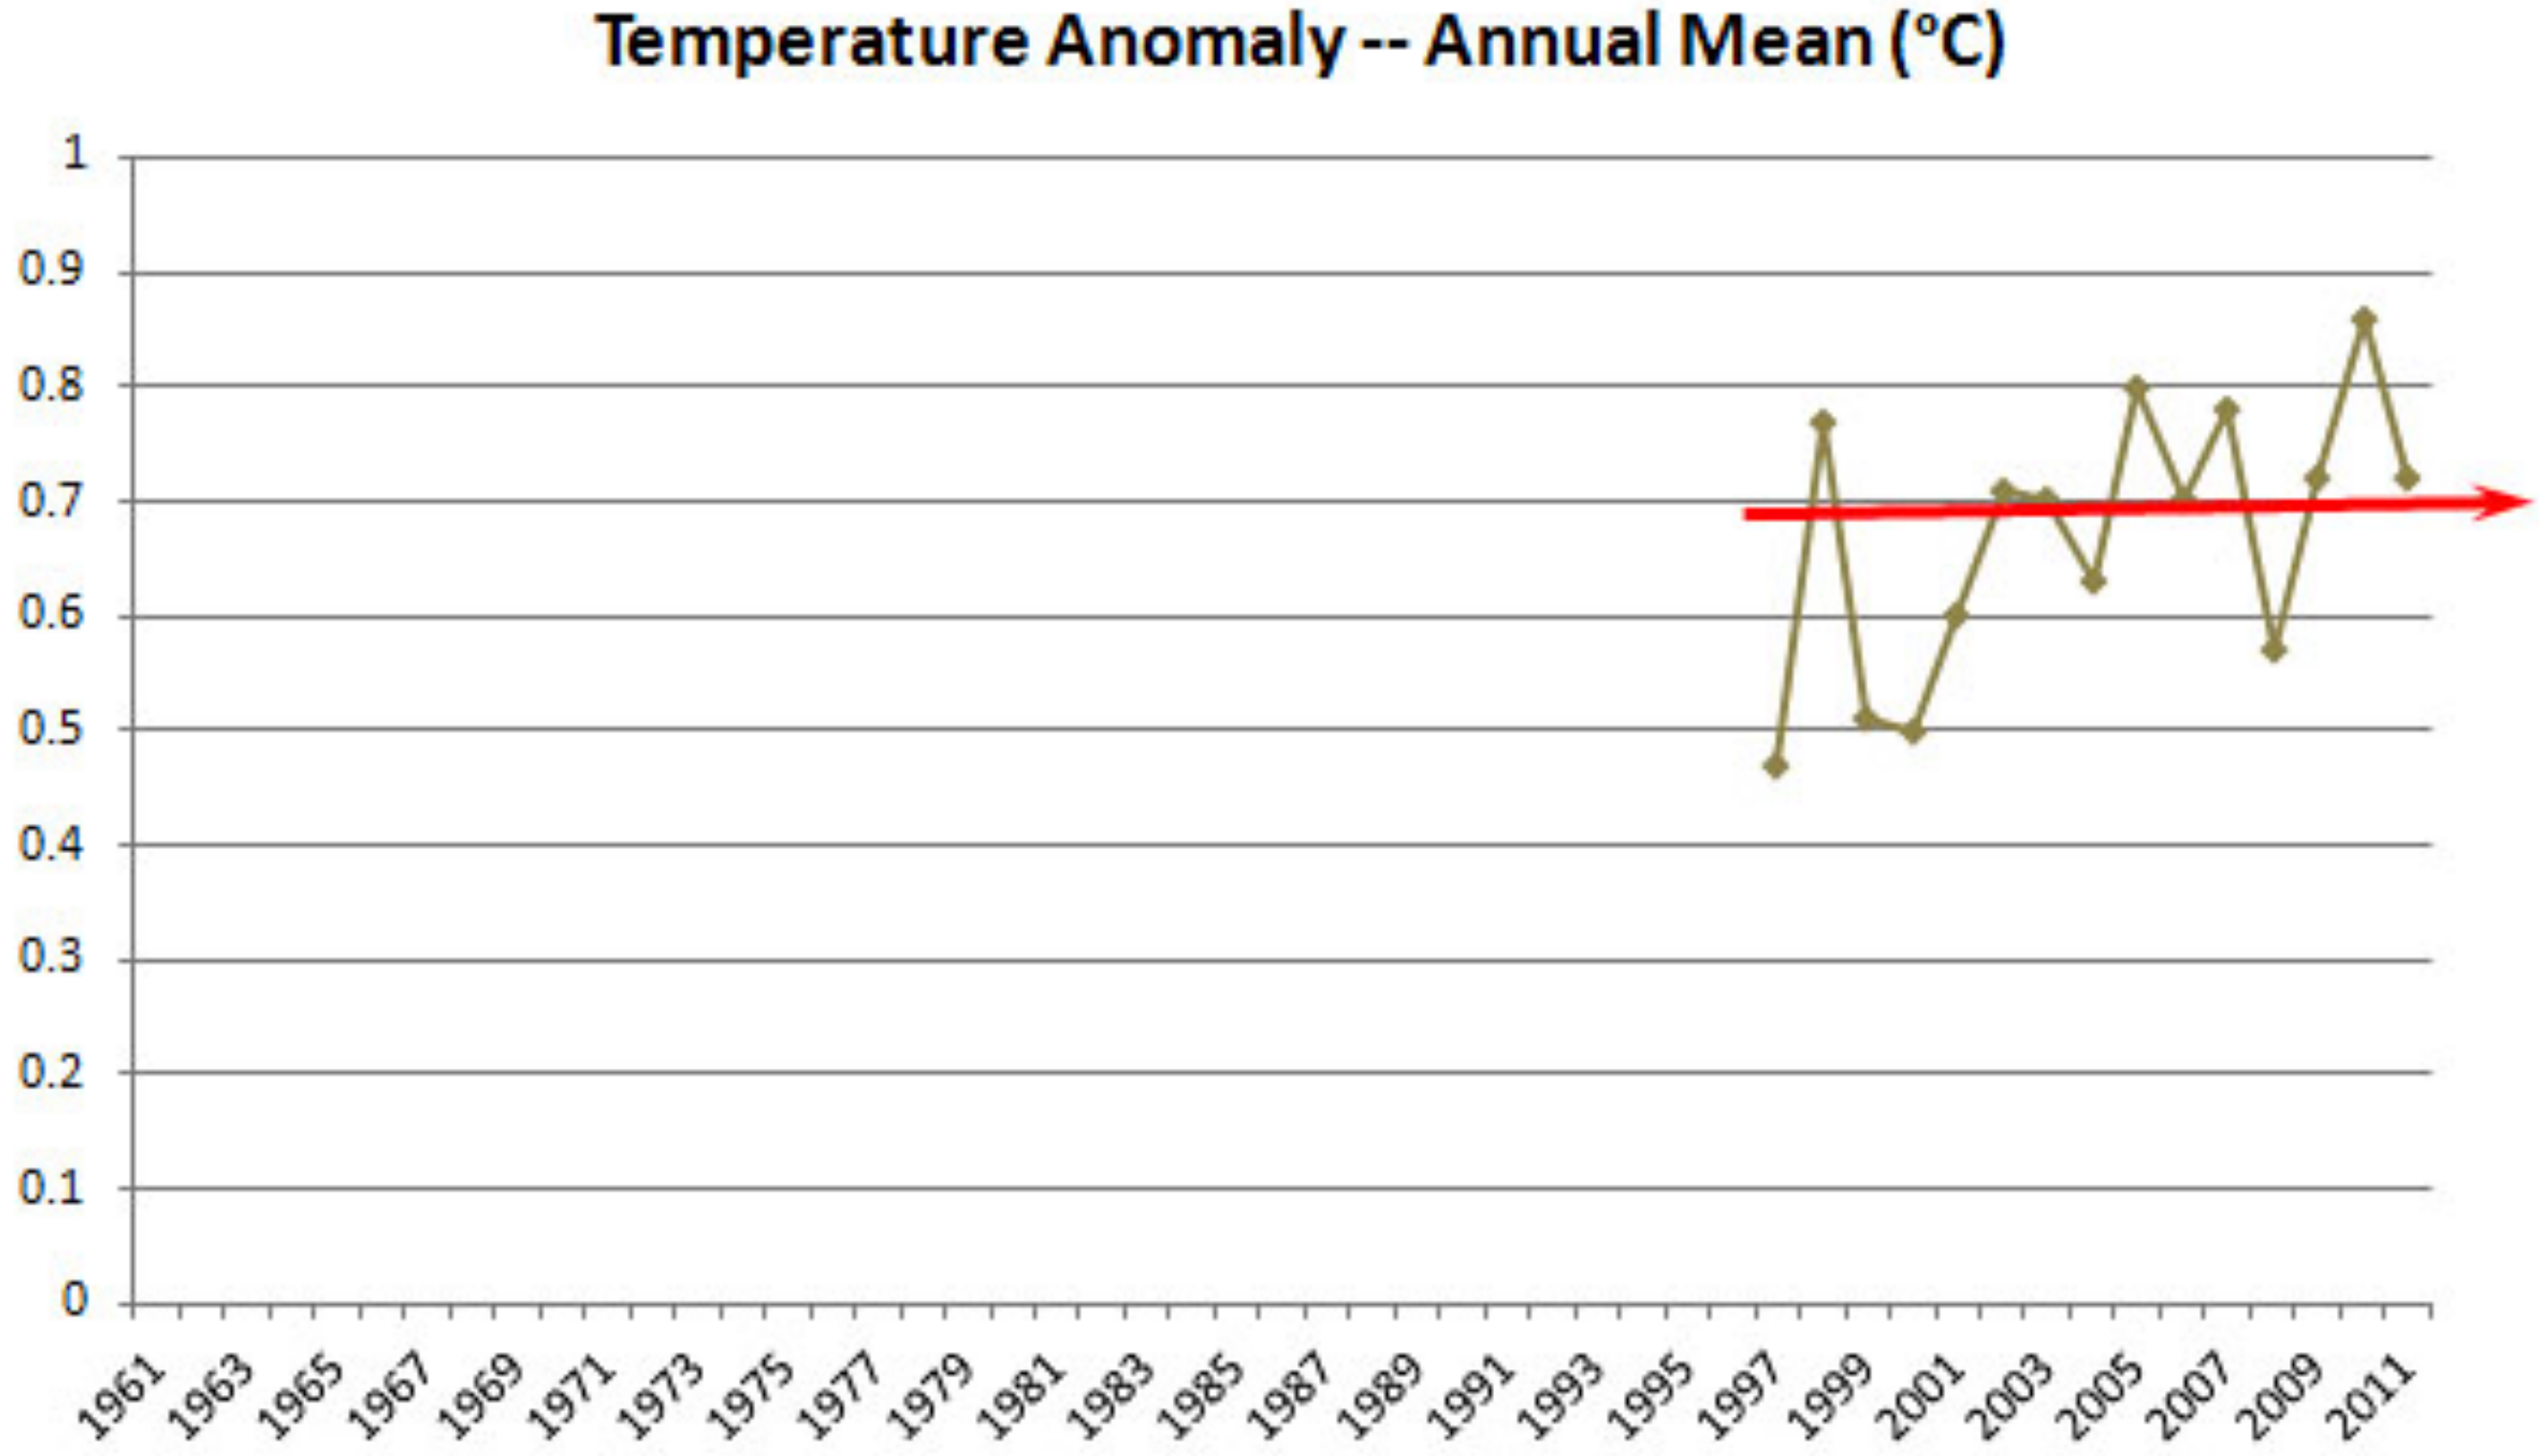

NASDAQ 2939.52 ▼ 6.32

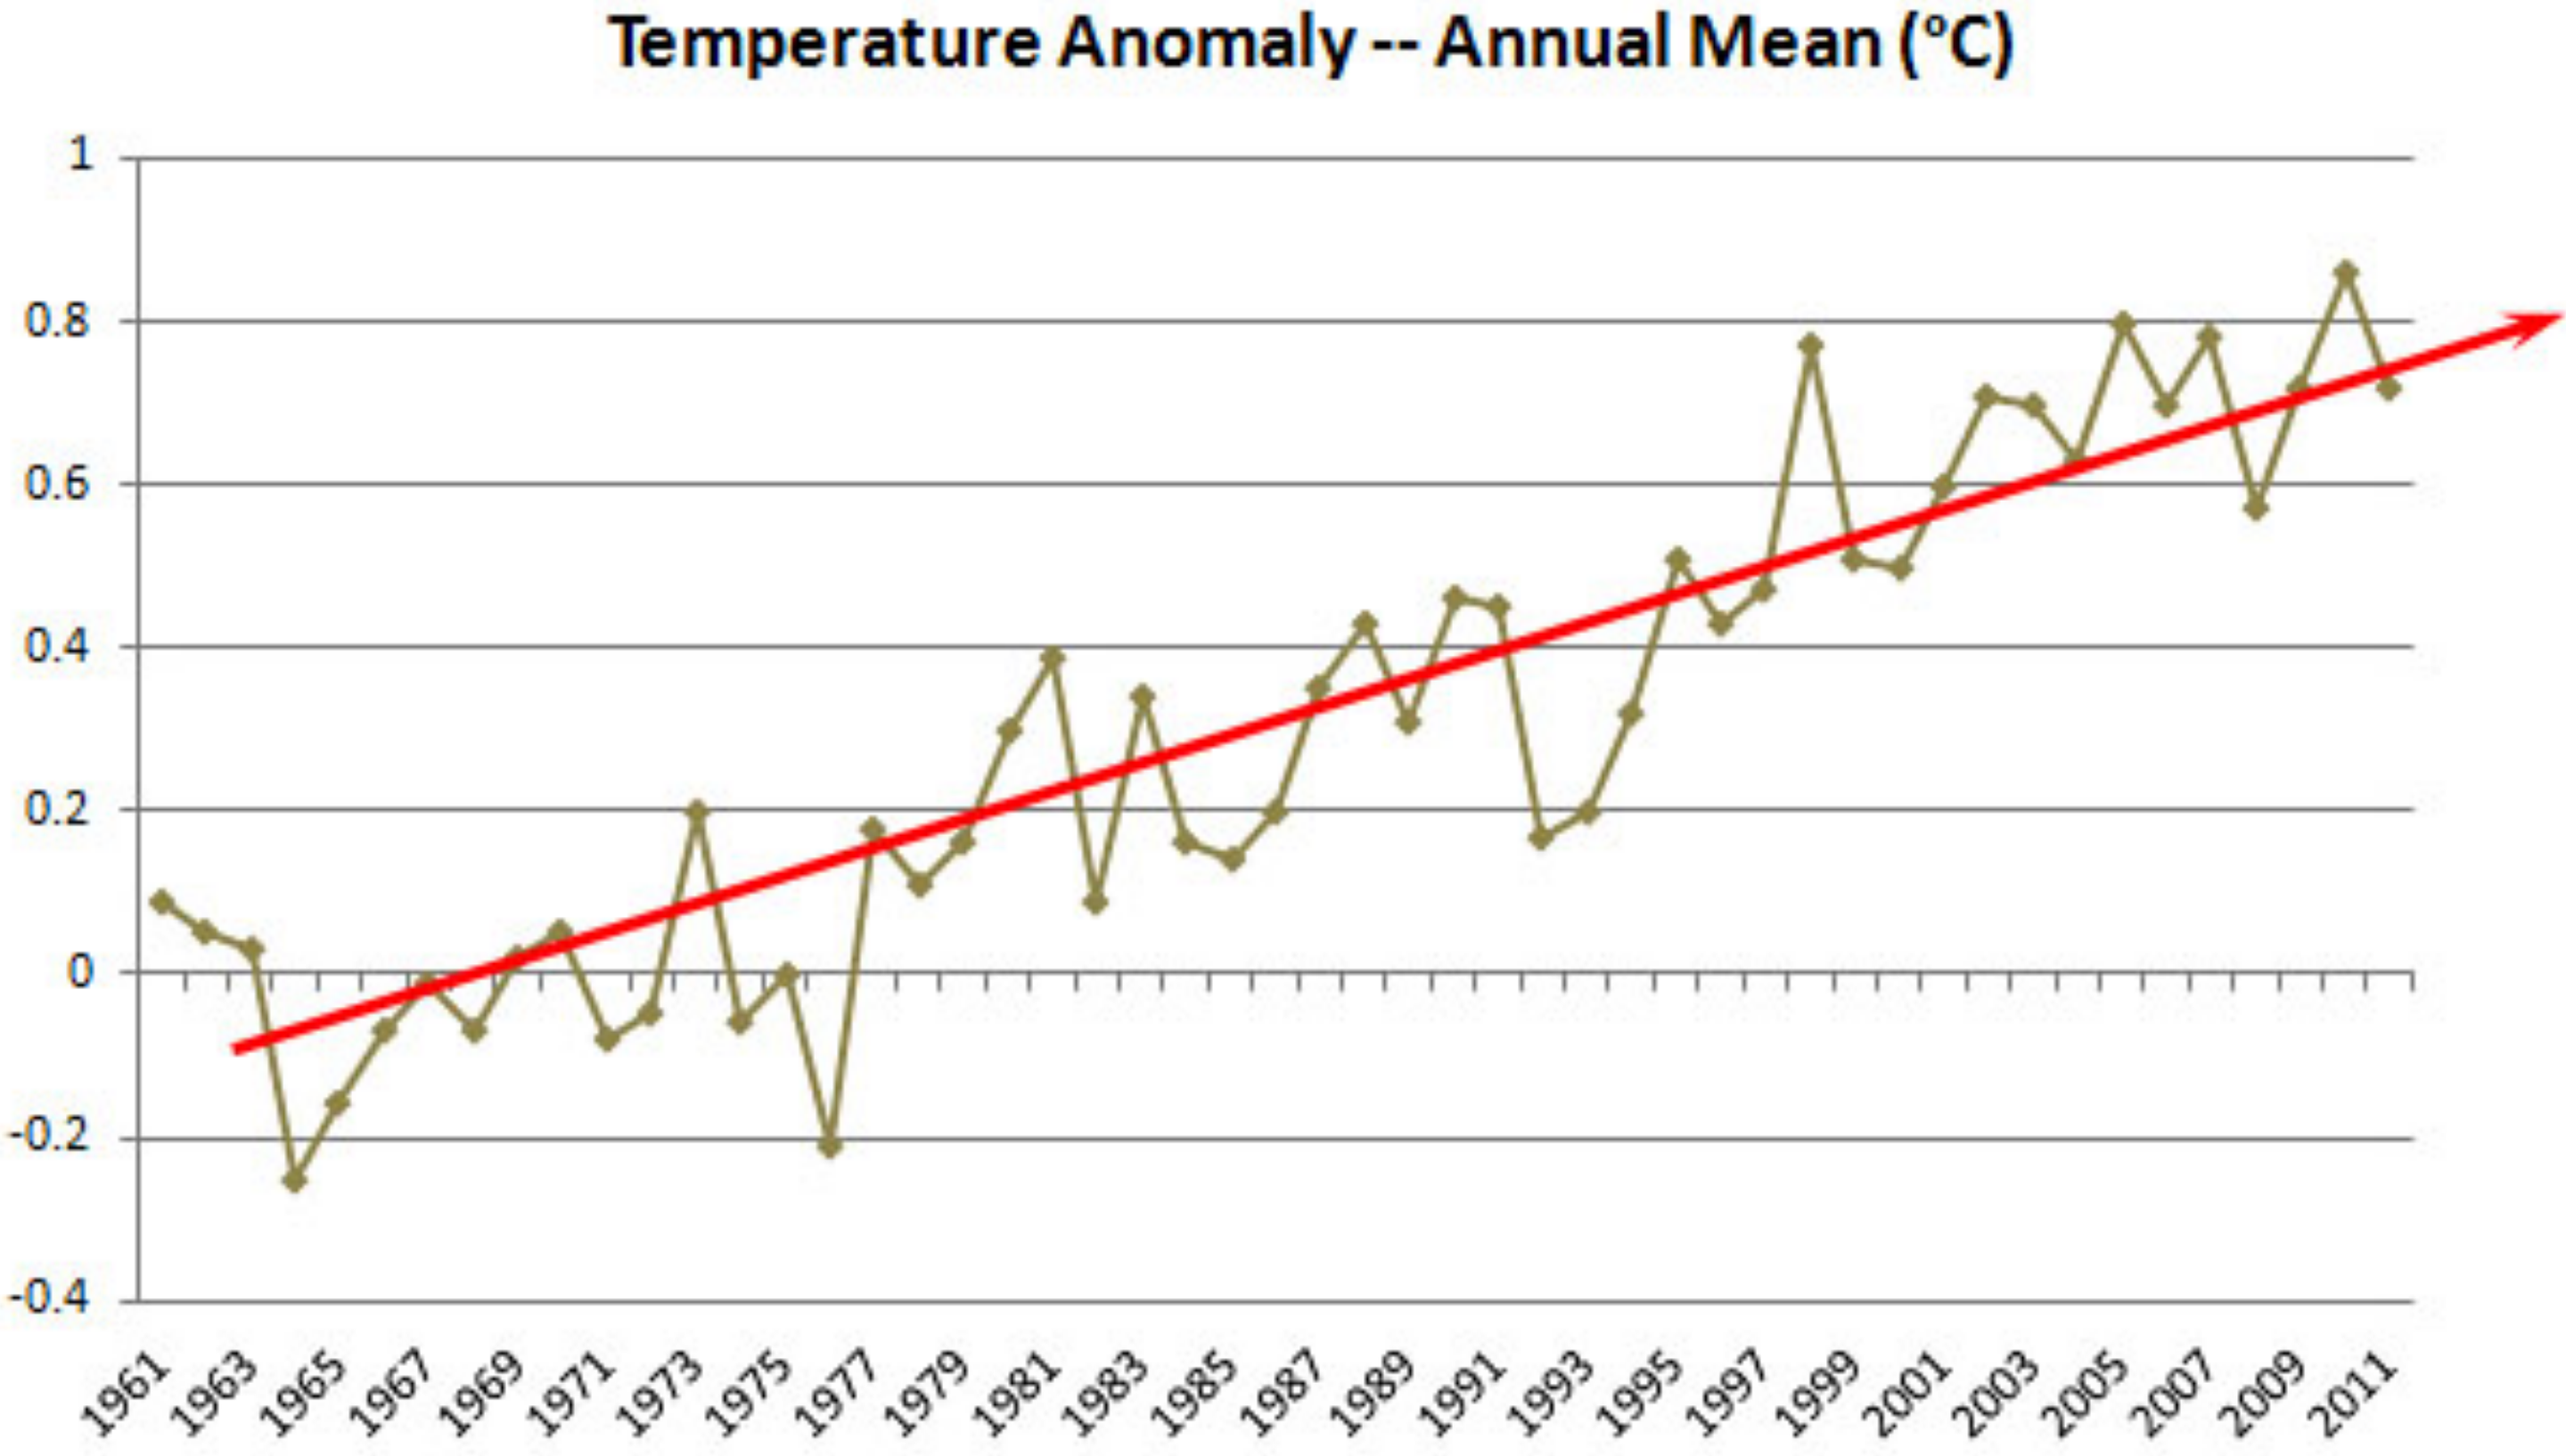

7. Context

Is the data shown in the appropriate context

Global Warming?

Global Warming - Frame the Data

7. Interaction

What kind of interaction is used?

Is the interaction appropriate for the medium?

Is direct manipulation used?

What is the purpose of the interaction?

8. Would derived data be better?

E.g., show change instead of absolute values

Show distribution instead of data points

9. Other Guidelines

No Unjustified 3D

Time progresses linearly

Appropriate legends, labels
